

REMARKS

The specification has been amended to include an earlier definition of the acronym "THEIC" (defined at page 11, line 17 of the specification). No new matter was added. In the Summary of the Invention and the Abstract, Component B) was amended to include the additional elements of silicon and zinc. Support for these additional elements can be found on page 5, lines 16-21 of the specification. The remaining amendments to the Specification merely correct grammatical errors.

Original claims 1-14 have been canceled without prejudice or disclaimer, and claims 15-22 have been added for consideration. Claim 15, corresponding to original claim 14 covering Invention II, includes all of the limitations of the base claim 1 and the intervening claim 13. The remaining claims depend from claim 15. Component B) of claim 15 includes the additional elements of silicon and zinc. Support for these additional elements can be found on page 5, lines 16-21 of the specification.
